## Token Allocation

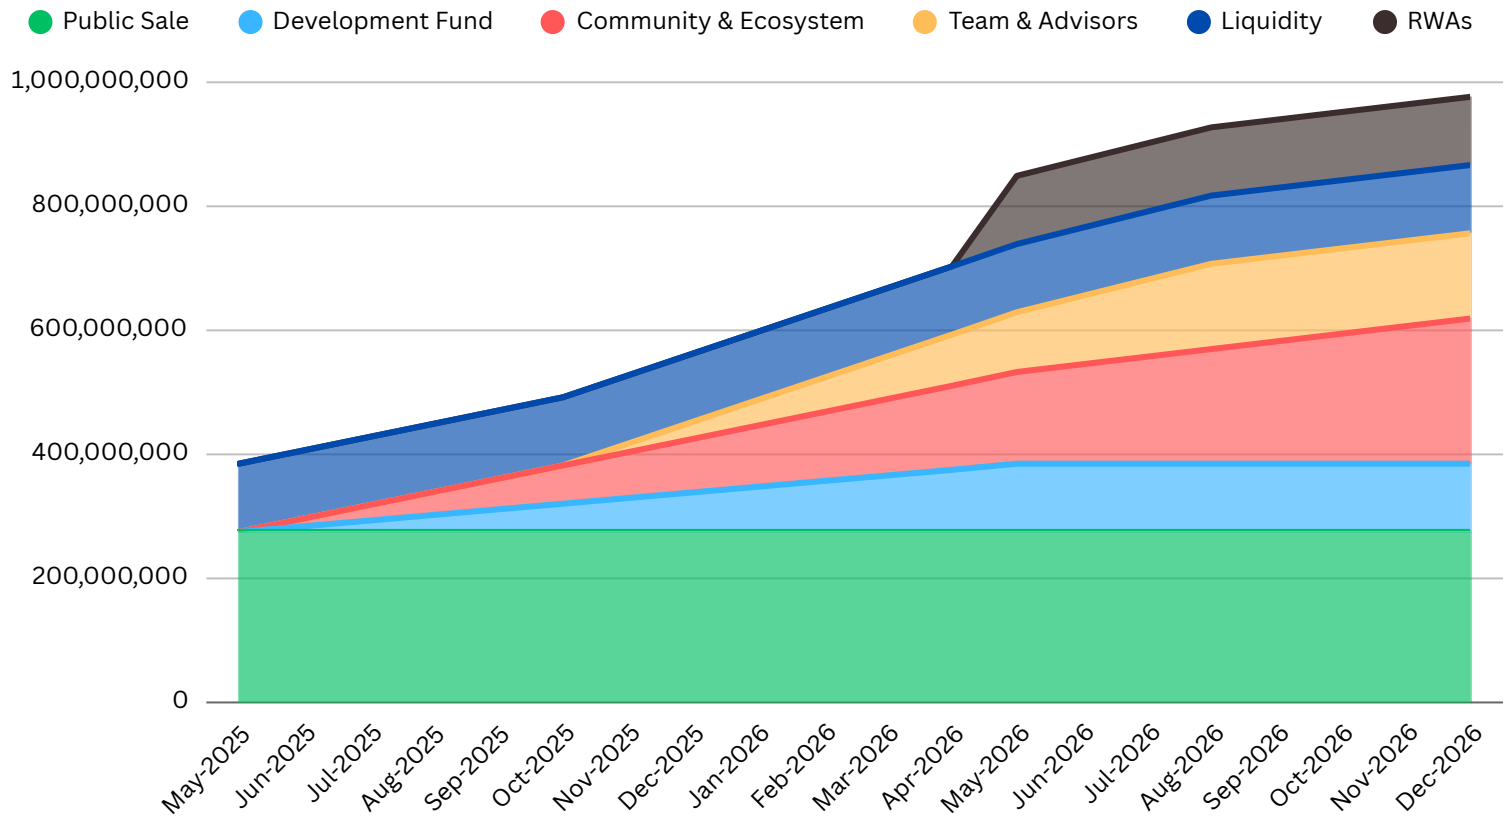

|                                  | Percentage | Description                                                                                                                                                                                                                  |
|----------------------------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Public Sale (ICO or IDO)</b>  | 25%        | 275 millions \$AIQA tokens initial offering to raise initial funds.                                                                                                                                                          |
| <b>Community &amp; Ecosystem</b> | 35%        | Empowering participants with agents and data ownership, rewarding meaningful contributions, and driving the ecosystem's sustainable growth. This also includes social media campaigns, partnerships, and promotional events. |
| <b>Liquidity</b>                 | 10%        | To stabilize the price on exchanges and Defi pools.                                                                                                                                                                          |
| <b>Development Fund</b>          | 10%        | Vested over 12 months for continuous development and improvement of the platform and others operation costs such as server rentals, hardware maintenance software licensing and marketing.                                   |
| <b>Team &amp; Advisors</b>       | 10%        | Locked before and 6 months, then vested over the next 12 months (18 months total) to ensure long-term commitment.                                                                                                            |
| <b>RWAs</b>                      | 10%        | Real-World Assets. Locked for 12 months and board members can vote to extend the locked period or issue a RWAs.                                                                                                              |

### Token Taxes

The token has 0% taxes. No additional fees are applied when buy, sell or transfer.

## Token Vesting Schedule

## Staking Rewards

Staking and farming pools will be launched, with \$AIQA rewards distributed from the Community Rewards Wallet to participants. To drive ecosystem growth and incentivize participation, stacking \$AIQA tokens, enables users to gain ownership of their AI agents and data—unlocking the ability to customize, fine-tune, and monetize their models.

The initial staking pools will be as follows, with adjustments over time:

- **Standard**

- 30 Days — 3% APY
- 60 Days — 7% APY
- 90 Days — 15% APY

- **Agent & Data Ownership**

- 365 Days — 25% APY

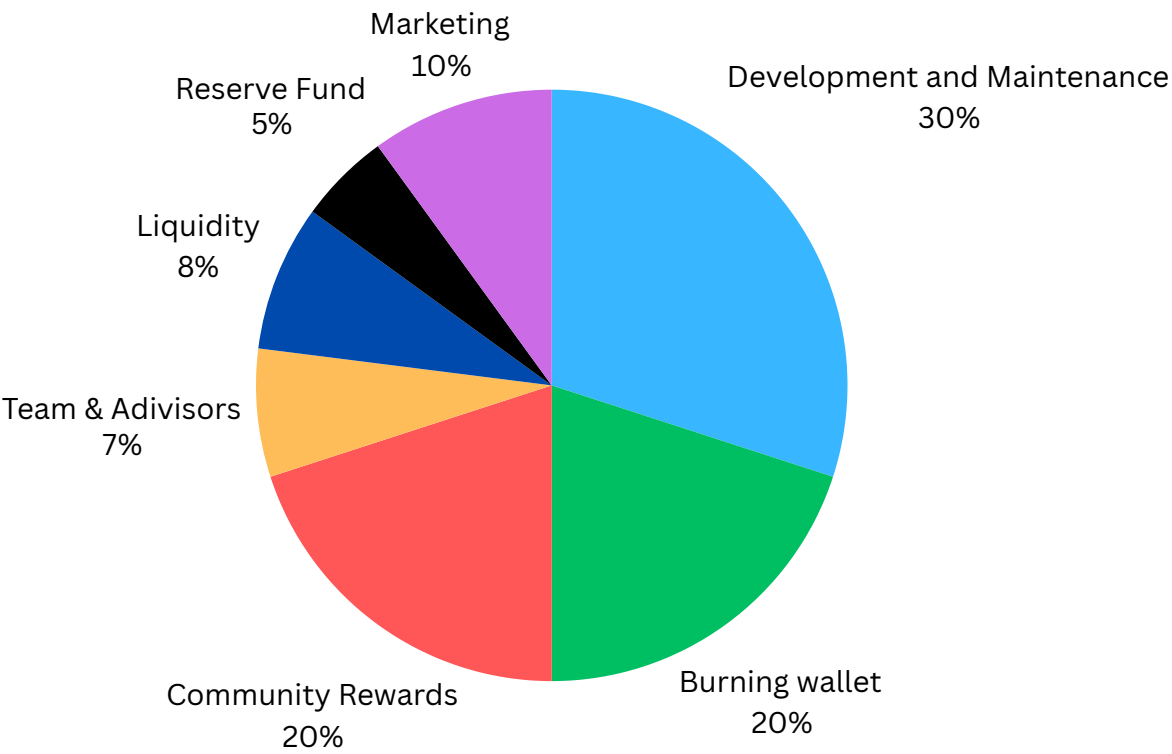

- **Computing & Storage**

- 365 Days — 50% APY

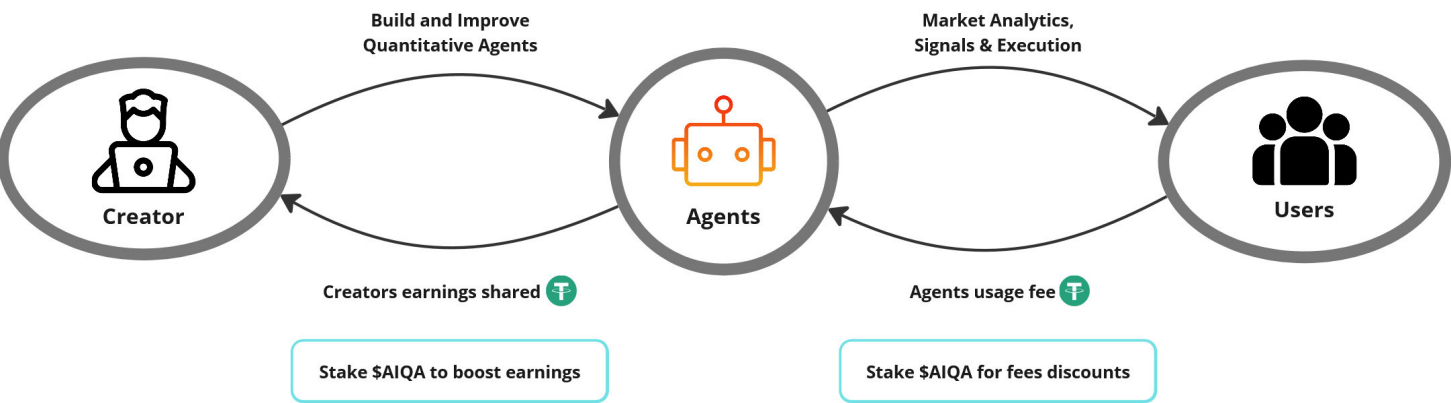

Burning Mechanics

To ensure scarcity over time 20% of the fees collected in \$USDT will be used to buyback and burn \$AIQA from the market.
